

Your benefit with **wasser**[®] wellwasser

500 mineral water bottles at
0.33l each per month (28 days),
purchase price: 0.64 €

Mineral water
6,000 bottles per year
3,840.00 € per year

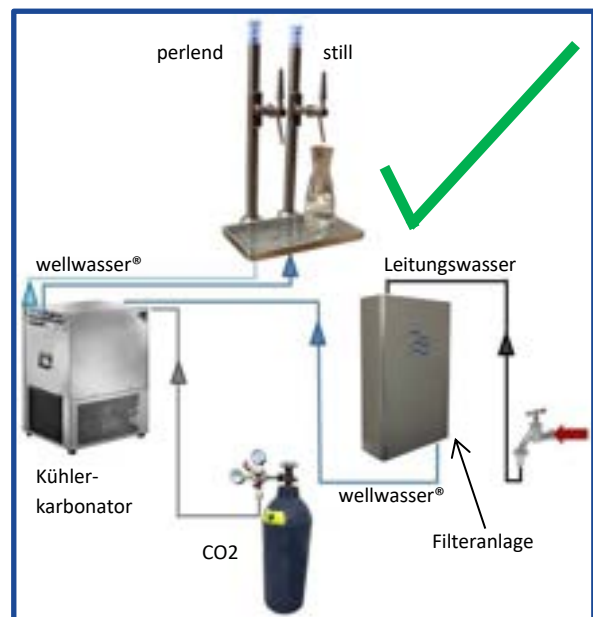

usage fee for wellwasser[®]
119.60 € per month

wellwasser[®]
1,435.20 € per year

savings with wellwasser[®]
annually 2,404.80 €

With our water treatment system you use local resources and are committed to environmental protection and sustainability

- from tap water in your restaurant or hotel you produce wellwasser®
- delivers fresh still or sparkling wellwasser®
- clean and germ-free filtered
- natural minerals are preserved
- no more lugging crates of water bottles
- no cooling requirement for bottles
- space saving
- time saving by avoiding procurement, storage and waste disposal

Low price, space and time saving

The wellwasser® GASTRO V10 is offered via a so-called "Licence Package". For a monthly payment we provide you with the system and you have the right to use the wellwasser® brand. The monthly usage fee includes the service material for one year. The work time and travel expenses will be invoiced directly to you by the responsible service company. If the appropriate conditions are met, the installation will be quick and uncomplicated.

Your tap water becomes a premium water, namely wellwasser® still or sparkling.

wellwasser® is served in the branded wellwasser® glass carafes. Professionally presented and offered in the beverage menu, wellwasser® can be sold profitably still or sparkling. Experience shows that through a self-confident presentation, there are no reservations about price and/or quality on the part of the guest

Are you worried about charging for water? You do not charge for water but for wellwasser® and your services.

No more lugging and saving a lot of space

Have you ever thought about how much time you can save when you no longer must procure, store and dispose of mineral water? ...

... how much space you would save if you no longer had to store water crates?

... and how much energy is saved when you no longer have to cool mineral water bottles?

Example:

With 6,000 bottles of mineral water in 1 year, that's 300 crates, you move a load of at least 12 tons on average.

WATER TREATMENT SYSTEM
wellwasser[®] GASTRO V11

Product description:

The GASTRO V11 is a 3-stage water treatment system which was developed for use in hotels and restaurants. The system is installed in the cold water pipe directly in front of the desired beverage tap system. The filter system rids the local drinking water of all impurities, unwanted odors, unpleasant tastes, and germs. Regardless of the quality of the existing drinking water, the GASTRO Edition produces water (wellwasser®) of the highest quality and of unique taste. Depending on your wishes, wellwasser® can be offered chilled or unchilled and carbonated (sparkling) or uncarbonated (still). This premium water (wellwasser®) is particularly suitable for hotels and restaurants as an optimal alternative to bottled water (mineral water, etc.) and offers countless advantages.

- wellwasser® is *the* alternative to bottled water
- wellwasser® freshly produced is available at any time
- wellwasser® saves the costly and time-consuming handling of reusable crates, heavy glass bottles or plastic bottles
- wellwasser® avoids plastic waste
- wellwasser® empties storerooms, cooling drawers and refrigerators
- wellwasser® is environmentally friendly because no transport is necessary
- wellwasser® still or sparkling is the shortest way from the source into the glass of your guest
- wellwasser® stands for sustainability and environmental protection
- wellwasser® is crisis-proof

Technical Data:

The three-stage water treatment system consists of:

- **Stage 1:** Activated carbon settling filter removes dirt particles, odor and unpleasant taste, organic pollutants, pesticides, hormones, etc.
- **Stage 2:** 0.2µm membrane with silver ions filters 99.999% of pathogenic germs. >LOG 5
- **Stage 3:** wellwasser® activator stabilizes and vitalizes water by means of selected crystals.

Housing:

The housing of the system consists of high-grade stainless steel 1.4301.

Dimensions: height 595mm, width 380mm, depth 140mm

Weight:

Total weight of the system: 12kg

Water supply connection:

In: 1/2" John Guest

Out: 1/2" John Guest

Output:

Depending on the local water pressure up to 6.6 liters/minute or 396 liters per hour

We will gladly answer your questions and advise you.
