

## Wellwasser stainless steel dispensing column Elegance

Probably the noblest appearance at the bar

This elegant dispensing column attracts the attention of the guests in every bar with its slim diameter of 40mm and the stately height of 670mm. The acrylic glass cylinder on the top of the column is illuminated by LED and has a laser engraved Wellwasser branding.

The high quality compensator tap guarantees a hygienic tapping result.

The photo shows the combination for still and sparkling Wellwasser with platform drip tray and 1 liter Wellwasser carafe.

## Technical details

Elegant base with sloping sides for easy cleaning.  
To protect the counter-top construction against moisture the base of the column has an integrated O ring.

A finely brushed stainless steel tube with a diameter of only 40 mm. Despite of the slender design a sophisticated technology inside the dispensing column ensures an efficient accompanying cooling to the tap.

The stainless steel compensator tap Eurostar has the crucial hygiene benefit. For daily cleaning the front part can be removed without turning off the water supply.

Fast installation of the column thanks to fixation on the central tube. Inside the tube are the cooling circulation, the beverage line and the cable for lighting. All hoses are carefully insulated against condensation.

**Material:** stainless steel 1.4301

**Drilling diameter:** 35 mm

**Dimensions:** height: 670 mm; tube diameter: 40 mm

**Dispense height:** for bottles up to 300 mm with fitted drip tray, 270 mm with platform drip tray

**Connections:** beverage hose John Guest 3/8"

**Electrics:** mains adapter with rubber connector 230 V, 50 Hz for both dispensing columns
